Authority on Authority

In His Masterly Analysis of Legal Publications

FREDERICK C. HICKS, A.M., LL.B. Litt.D.

*Associate Professor of Legal Bibliography, and Law Librarian,
Columbia University Law School*

Has the following to say on Citation Books:

"CITATION BOOKS have reached their highest development in the United States where the rule of stare decisis is more rigidly applied than in England.*** They are therefore of very great importance and utility to the American lawyer. *** For 'running down' a particular case, treatises, digests and encyclopedias are cumbersome, unwieldy and uncertain tools. In using them it is necessary to think from the general to the particular,—from the principle to the illustration of it. Citation books, on the contrary, deal only with particulars.*** The best description of American citation books in skeleton form is to be found in Legal Bibliography, the Citation Phase, published by The Frank Shepard Company.***" See Hicks' Legal Research, pp. 278-279.

THIS DISTINGUISHED AUTHOR DEVOTES THREE WHOLE PAGES TO THE MERE LISTING OF THE SHEPARD CITATION BOOKS. HIS IDEA OF THEIR IMPORTANCE IS SHARED BY EVERY JUDGE AND LAWYER WHO UNDERSTANDS THE USE OF THE TOOLS OF HIS PROFESSION.

THE CONSTITUTION AND THE COURTS

The Supreme Law of the Land

A work that judges, lawyers, legislators, publicists, teachers, and every citizen of the United States who takes an intelligent interest in public affairs should have.

For a correct understanding of the various provisions of the Constitution one must read in connection therewith the court's interpretation.

The United States Supreme Court for one hundred and thirty-five years has been searching out and declaring the meaning of the Constitution clause by clause, and this great body of judicial interpretation is here presented in a most exhaustive and satisfactory manner.

In this set the Constitution is annotated clause by clause and these annotations are exhaustive in the citation of cases. The holdings of the decisions are fully set forth, and the notes abound in copious excerpts from the opinions.

The completeness and accuracy of these notes is established by the fact that no errors or omissions have been discovered in them by the thousands of lawyers who have used them for years in Federal Statutes Annotated, from which they are reprinted. Everything in these annotations is made instantly accessible by a very full index, and they are right up to date in the citation of cases.

Another important feature of this work that every student of the Constitution will find of great interest and value is the treatise on "The Growth of the Constitution in the Federal Convention of 1787" by William M. Meigs of the Philadelphia Bar. This treatise of nearly two hundred pages was produced from a careful study of the debates, and gives the whole origin and growth of each clause from beginning to end in the Convention.

The set consists of three handy-size volumes—about 2500 pages in all—handsomely bound in blue fabrikoid, and it will prove a valuable addition to your office or home library.

The price is only \$15.00 delivered
